

With the Unlimited Data Option, is there a limit to how much data I can use?

This article is part of the [Questions and answers about our Data Usage Plan](#).

Xfinity's new internet plans now include unlimited data and equipment at no extra cost with no annual contracts or early termination fees. [Learn more](#).

Previous Xfinity Internet plans include 1.2 Terabytes (TB) of data per month. If applicable, xFi Complete remains available in select markets to purchase unlimited data.

No limit to data usage

For customers who typically use more than 1.2 TB per month and don't want to pay for overages, we offer an Unlimited Data Option. Data usage is unlimited when enrolling in this plan. Your use of the Xfinity Internet service remains subject to our Acceptable Use Policies for residential services. To learn more about our policies, see [Customer agreements, policies, and service disclosures](#).

The Unlimited Data Option is available for a fee. This fee is independent of your actual data usage.
